

City Corporation Ignition HMI Upgrade

Russellville, Arkansas

Certified Premier Integrator Brown Engineers is helping City Corporation capitalize on the "New SCADA" benefits of Ignition™ by Inductive Automation™. Ignition's popularity isn't based just on great looks, price and flexibility, but also the game-changing value of getting all *this* for ONE flat license fee:

- **Unlimited Tags:** Can it send data? Integrate it: the sky's the limit.
- **Unlimited View Clients:** LIVE data can be accessed **anytime, anywhere, by anyone authorized.**
- **Web Server Deployment:** Rapid deployment of updates, modifications to multiple sites at once.
- **Advanced Database and Reporting Tools** for trouble-shooting, alert management, and documentation.

Ignition was deployed at the Pollution Control Works in March 2015, to be followed by installation and integration at the Water Treatment Plant.
